Then we understood that they long for this. Kirkeberg, Mads Ivar og Frøydis Strøm 2005 «Kvinnens og menns inntekt» i Toril Sandnes red. The age of the husband also has a negative effect, but it is not significant and much smaller in absolute value.

**An economic model of fertility, sex and contraception**

Second, when we calculate parameters  $d_5 - d_7 - d_3$  and from the OLS regression of 4. What Do We Really Know? We will now look at what happens to contraceptive effectiveness when the desire to avoid a pregnancy is reduced. We also notice that the consumption in the two periods are not arguments in the expected utility function - only the number of children in the first period, income in the two periods, and coital frequency and contraceptive use in the first period.

**Gender, employment and social security in Norway**

Fører fravær til lavere lønn på lang sikt? Omsorgspolitik for barn møter det fleksible arbeidslivet.
