### Cockroaches

You might spot an American cockroach in your basement, or hanging out somewhere near the ground floor. Recognize the brown or red-brown color of the roach. IGR's stop baby cockroaches from maturing into fertile adults, thereby interrupting the egg laying process.

### Cockroaches

At room temperature, nymphs will hatch out in 50-55 days. They do enjoy sweet foods, but prefer decaying material.

### Cockroach Pictures: Photo Gallery with Images

In the Northern United States, American cockroaches are typically found in sewers and drains. This approach will ensure that maximum control is obtained with the greatest safety and efficiency.

### American Cockroaches Control

An infestation of cockroaches can be dealt with, but it is first necessary to identify the kind of cockroaches living in your home. Recent research on the movement of Oriental cockroaches under, around and into homes from harborages in crawl spaces and cinder block foundations has shown that these cockroaches frequently move into the home along plumbing e.
