8 Best Home Energy Efficiency Improvements You Can Make

The curtain call Curtains can block, or let in the light — which means blocking or absorbing heat. You can ask Google to turn off Wi-Fi, set schedules, prioritize gaming traffic and more. Credit: Randee Daddona You can schedule the thermostat remotely on your phone and override settings.

Home Energy Solutions

Let your energy bill speak for itself. If you're looking for a mesh system with smarts and customization options galore, Nest Wifi is a solid choice.

Energy

They will not add much value to a property, however. All residential customers of Eversource, UI, CNG, and SCG are eligible for this program. Apps like ask a few quick questions about your energy habits, and then generate a comprehensive report that provides ideas on how to improve your efficiency.

120 Ways to save and conserve energy

Open the curtains when the sun is out for a simple type of solar power.

24 Tips for Energy

These services include weatherization and appliance replacement: If your major household appliances are more than 15 years old, they likely use a great deal of energy and cost a lot more to run than newer appliances. Set your refrigerator temperature between 28 and 42 degrees Fahrenheit and your freezer between 0 and 5, and make sure both are sealed tightly.

2020 Home Improvement and Residential Energy Tax Credits

The first step is to schedule a no-cost home energy assessment.

Easy Ways to Save Energy at Home

Just like any habit-forming app or step-counting wearable, you can quickly course-correct if you see yourself failing in real time.

31 Ways to Save Energy in Your Home

Cut so-called vampire power consumption and save a bundle. And skip the screen savers; they're not necessary to protect modern monitors, and it's much more efficient to simply set your monitor to switch off when it's not in use.
