Design of Cold Storage for Fruits & Vegetables

Honeydew melons that are ripening naturally or have been induced with ethylene are best held at 5° to 7.

Refrigerated Trucks for Transport Services {Highly Recommended}

However, this not a guarantee so shippers should not take it for granted.

USDA Report Says Higher Produce Trucking Rates May Lead to Closer Look at Rails

Produce season starts in the southern United States as early as March and gradually moves north. Products reach their lowest temperature near daybreak.

Using Air Curtains on Refrigerated Trucks to Maintain Temperatures

It is a market-driven partnership of public and private entities aimed at helping businesses move goods in the cleanest most efficient way possible. Then weather hits and a good flood takes out a rail line and all that rail traffic needs to go over the road temporarily. Therefore, a savvy chef, not wanting a handful of produce to go unused, will instead whip up a little bit of delicious.
