

# Clinical simulations in pediatrics

## Appleton-Century-Crofts - Telepresence Robots for Pediatric Clinical Simulations: Feasibility and Acceptability.

Description: -

- Host-virus relationships -- Congresses.
- Mammals -- Diseases -- Congresses.
- Viruses -- Reproduction -- Congresses.
- Parvoviruses -- Congresses.
- Anglo-Norman literature -- History and criticism.
- Anglo-Norman dialect.
- Ethnology -- New Guinea.
- Pediatrics -- Programmed texts.
- Pediatrics -- Case studies.
- Pediatrics -- Problems, exercises, etc.
- Clinical simulations in pediatrics
- Clinical simulations in pediatrics
- Notes: Includes bibliographies.
- This edition was published in 1979

Filesize: 57.78 MB

### Simulation for Clinical Preparedness in Pediatric Emergencies: A Pilot Study

This feasibility project assessed the use of a telepresence robot as a tool to introduce telehealth and to engage distance-based pediatric nursing students.

### Pediatric Nursing Care Clinical Simulation Scenarios for Prelicensure Students

Students reported high means across all items see Table 1.

### Clinical trial simulations in pediatric patients using realistic covariates: application to teplizumab, a glucagon

These robots incorporate positive qualities of video calls, such as allowing a provider to observe patients and students from a distance as they participate in simulations.

### Telepresence Robots for Pediatric Clinical Simulations: Feasibility and Acceptability.

This orientation also tested the functionality of each nurse practitioner student's Internet connection and allowed for troubleshooting as needed. Debriefing will then take place in verbal format with the facilitator and clinical faculty leading students in reflection.

### Clinical Simulation

We further assessed feasibility through data gathered after the second simulation debriefing using two questions we developed for prelicensure students on their ability to use structured communication and to communicate assessment findings to the telepresent nurse practitioner.

### Simulation Training in the Pediatric Tracheostomy and Home Ventilator Population

Ultrasound Training Blue Phantom ultrasound equipment with multiple modules for training. What do you feel went well during the simulation?

Aplastic crisis results when an infection causes the bone marrow to stop producing red blood cells. Both active arms will occur in the simulation center or sleep lab and replicate the same clinical situations by the simulation instructor.

### **Clinical Simulation**

End-of-life simulation experiences can assist nursing students in meeting the following QSEN competencies: a patient centered care, b teamwork and collaboration, and c safety. Our team can help you provide meaningful virtual experiences that facilitate clinical-based learning and understanding of clinical concepts.

### **Pediatric End**

The instrument's reliability was tested using Cronbach's alpha, which was 0. When asked the following questions, respond with the statements in INTRODUCTION OF SCENARIO Setting the Scene Scenario 1.
