### Why the UN's latest report on the state of our planet's biodiversity and ecosystems matters to financial institutions

In 2015, we set up a CSR index. In Ghana, she said, one of the key drivers of poverty is disaster vulnerability. It also promises more peaceful and inclusive societies.

### Our 2019 Progress

All people must enjoy a basic standard of living, including through social protection systems. Small island developing States including those in the CARICOM region have contributed the least to climate change, but they remain most at risk from its negative effects and the least equipped to withstand and adapt to it, she stressed, calling for a change in the global status quo concerning rising temperatures. ODA providers reaffirm their respective commitments, including the commitment by many developed countries to achieve the target of 0.

### Environment, Climate Change and Land Reform Committee

They will benefit from the active support of the UN system and other multilateral institutions. At the national level, the country has mainstreamed climate actions and disaster management into a planning and sustainable development strategy. The core skills with which a graduate leaves college or university are highly sought after, especially in a modern world looking to drastically reduce carbon emissions and discover and develop the technologies of the future.

### Fridays for Future named UN Champion of the Earth award for passionately demanding climate action

We are committed to achieving sustainable development in its three dimensions — economic, social and environmental — in a balanced and integrated manner. Emphasizing the need for donor countries to the United Nations to provide adequate support to help small island developing States implement the Pathway and the 2030 Agenda, she spotlighted critical resource gaps and noted that those nations face major development challenges attributable to their small populations, spatial dispersion and remoteness. While the country can do more, Nigeria emphasizes the need

for shared support in combating desertification, drought and other climatic hazards, posing as they do a fundamental threat to the existence of humanity.

### **UN Migration Agency Stands with Partners to Combat Plastic Waste and Environmental Degradation**

By 2030, wind energy alone could produce a 7.

### **10 Reasons Renewable Energy Can Save the Planet**

Collaboration and Disclosure Colgate is committed to transparency and has reported publicly on our carbon and energy reduction performance since 2004.

### **10 Reasons Renewable Energy Can Save the Planet**

We will draw as far as possible on the existing network of follow-up and review institutions and mechanisms. One in which development and the application of technology are climate-sensitive, respect biodiversity and are resilient.
