It's just a matter of implementation. Because the 16% increase in cold starts is relatively small in comparison to the 54% decrease in VMT, the overall impact on TOG and CO is unclear, and should be investigated in more detail using emissions modeling tools. Taxes, payroll deductions, and the applicability of other labor and employment laws may be different depending on the state where the work is performed see below.

Review: State of teleactivities

Thus, as expected from the travel behavior analysis, the two pollutants that are most directly dependent on VMT NO_x and PM decreased substantially, roughly in proportion to the VMT reduction of 54%. · Vehicles not used for commuting may be driven by other household members.
