### The Rocket Men: Vostok & Voskhod. The First Soviet Manned Spaceflights

References Cite this chapter as: B. And indeed, Dovgan sometimes felt as if he were.

### Lost Cosmonauts

This analysis, rather than being based on overhead photography obtained by U-2 or satellite reconnaissance missions, focuses on the content of two Soviet documentary films — First Voyage to the Stars and Again to the Stars —on the flights of Yuri Gagarin and Gherman Titov.

### Chronology of Manned Space Missions

The modules are being carried to orbit on Russian booster rockets and in the space shuttle and are assembled in orbit. Goddard's experiments in the 1920s and 1930s showed a practical way to loft objects and people into space: the liquid-fueled rocket.

### 10 Most Important Space Missions

Two flew to Earth orbit only, three circumnavigated the Moon but did not land, and six landed.

### THE POLITICS OF THE SPACE RACE

The body of the assessment provides a description of current and past Soviet space stations, cosmonaut training facilities, command-and-control capabilities, space launch facilities, the projected capability for the 1980s, the projected capability for the 1990s and beyond, and Soviet intentions with regard to military, political, economic and scientific applications.

### Chronology of Manned Space Missions

The three astronauts crowded into the two-person lunar lander to ride out a ninety-hour flight back to Earth. The future space program also received an important boost from German scientists who either fled to the before the war, or who intentionally fled the advancing Soviet armies to surrender to United States and British forces.
