### Preliminary Rulemaking Activity

A Technical Corrigendum against an approved standard changes the normative meaning of the standard upon its approval and thus must be developed through the Company Review Process. Sufficient information must be included to uniquely identify the location affected, including page, section, and line numbers, when available. Client Response The client has the opportunity to respond to the audit findings prior to issuance of the final report which can be included or attached to our final report.

### Technical Processes Overview

The major issue addressed in original article was the desirability of flexibility in wiki publishing.

The criteria for selection of a candidate standard for submission as an ISO PAS and the process for approval of the submission are documented in this section. The motors and ESCs each have dozens of internal components, and the level of representation of these components is dependent on the requirements that must be levied on the system.

### Technical Processes Overview

Following is a sample flowchart of the process that you may find helpful: Planning During the planning portion of the audit, the auditor notifies the client of the audit, discusses the scope and objectives of the examination in a formal meeting with organization management, gathers information on important processes, evaluates existing controls, and plans the remaining audit steps. The votes will be counted by The Open Group Manager and the results normally circulated within one 1 week after the end of the ballot period. The Sponsor is free to recommend rejection of some or all Change Requests at this stage.
