Although there are a growing number of studies in the past two decades focusing on this emerging public health issue in Mainland China, we identified a lack of research focused on rural areas. Multifactorial and multiple component interventions for preventing falls in older people living in the community.

T13 A22 Nei ming Monthly 1987-1997 BQ3. Table shows the risk of bias within and across quasi-experimental studies.

### Falls prevention interventions for community

There were 77 studies with RCT design and 24 studies with quasi-experimental design. Gai ge yu jian she wen ti zhuan ji -- di 33 ji. Three recommendations for future falls prevention research in Mainland China are: one, community-based falls prevention interventions need to be evaluated in rural settings; two, multifactorial interventions that include individual risk assessment and personalised interventions need to be investigated; three, the effectiveness of poorly utilised interventions, such as psychological, social environment, management of urinary incontinence, fluid or nutrition therapy and surgery, need further exploration and investigation for older people in Mainland China.
