

Symposium and core seminar on the geology and mineral resources of the Greater Green River Basin, Casper, Wyo., Sept. 17-19, 1973

Wyoming Geological Association - Coexisting with Large Carnivores: Lessons From Greater Yellowstone

Description: -

- Japanese fiction -- Edo period, 1600-1868
Borings -- Green River Watershed (Wyo.-Utah) -- Congresses.
Mines and mineral resources -- Green River Watershed (Wyo.-Utah)
-- Congresses.
Geology -- Green River Watershed (Wyo.-Utah) --
Congresses.Symposium and core seminar on the geology and mineral resources of the Greater Green River Basin, Casper, Wyo., Sept. 17-19, 1973

- Field conference guidebook - Wyoming Geological Association --
25th.Symposium and core seminar on the geology and mineral resources of the Greater Green River Basin, Casper, Wyo., Sept. 17-19, 1973

Notes: Includes bibliographical references.

1999 Annual Report

Gosta 1963 Some Problems in Connection with C-14 Dating of Tests of Foraminifera. Plutonism in the Idaho Batholith spanned 98—53 Ma in a contractional setting; it was abruptly superseded by major extension in the Bitterroot, Anaconda, Clearwater, and Priest River metamorphic core complexes 53—40 Ma and by major volcanism in the Challis volcanic field 51—43 Ma. This discrepancy is explained by isoreflectance lines, which parallel the Pinedale anticline and indicate that approximately 2000 ft 610 m of structural relief occurred after maximum burial.

Coexisting with Large Carnivores: Lessons From Greater Yellowstone

In such fossil subduction complexes, it is generally difficult to reconstruct details of the accretion of continent-derived sediments and to evaluate the factors that controlled accretion. Plans are afoot for possible future application in Australia Xu et al. Recent research in the Greater Yellowstone region on these species, as well as coyotes, lynx, wolverines, and black bears, has contributed substantially to our understanding of natural history, ecological processes, and human impacts on ecosystems.

New Books Listing

Selected papers reprinted from Journal of Sedimentary Petrology. One example of how this power contest hindered both species conservation and the establishment of a cooperative program was the black-footed ferret case in Wyoming; see T. Lake Kivu's reserve of dissolved CO₂ is deep-sourced in the mantle and crust.

1999 Annual Report

It is still produced and sold today Abbott, undated; Kruszeinicki, 2015. Short Course in Paleontology Number 6. Geological Society of America,

Boulder, 1972.
