### Iranian Revolution

In some of its basic characteristics, the revolution did not conform to the usual norms of Western revolutions, because the state did not represent just an ordinary dictatorship but an absolute and arbitrary system that lacked political legitimacy and a social base virtually across the whole of the society. Prime Minister Shapour Bakhtiar, who had been in office for just a few weeks, freed all political prisoners, ordered the army to stand down in the face of demonstrations and abolished the SAVAK.

The implementation of these new policies sparked the beginnings of the well-known Iranian Revolution.

Khamenei, who has led the country since 1989, is eighty years old and a prostate-cancer survivor, rumored to be in poor health. More patients started coming in, first a few at a time, then in droves, many of them dying. At least fifty clerics and political figures were infected, and at least twenty died.

He enacted a Family Protection Act that established family courts to handle divorce and child custody cases. But the election and the protests marked a turning point for the Islamic Republic. Among the items cancelled were 160 General Dynamics F-16 fighters 3. Most have renewed longstanding demands for administrative autonomy, the abolition of official restrictions on non-Persian cultural activities, and the formal acceptance of their native tongues as official languages, along with Farsi, in their own provinces. Separation of sexes, which had been a traditional practice, had been banned.

In 1985, however, legislation was passed permitting women to initiate divorce proceedings in certain limited circumstances. A more secular take on religion was adopted, where religious minorities could hold office. The revolutionary elite have become so preoccupied with their continuing confrontation with the United States that they have neglected urgent domestic problems such as the economy and the environment, at great long-term cost to the stability of the Islamic Republic.
