Evaluation of Non

Handbook of non-invasive methods and the skin. Ethics approval and consent to participate Patients provided informed written consent prior to their participation to the study. In: Scott RC, Guy RH, Hadgraft J, Bodde HE eds Prediction of percutaneous penetration-methods, measurements, modelling.

Optical Non

Time courses of NESD for EV1 and EV2. Tissue oxygenation was more variable, with lesions often showing decreased oxygenation in the center surrounded by a zone of increased oxygenation.

Transepidermal Water Loss

Bioengineering technologies offer today valuable benefits in research and therapeutic fields; information obtained noninvasively *in vivo*, rapid results, high objectivity, high reproducibility and the possibility to choose any skin area are just a few advantages of bioengineering technologies. Each data set for each visit was therefore converted according to and 2 , with W fixed as shown in 3. In: Leveque IL ed Cutaneous investigation in health and disease, non-invasive methods and instrumentation.

Evaluation of Non

EDS and SB contributed to the conception of the study, the revision of the manuscript language and the drafting of the manuscript. RO acquired the data by screening the papers identified on PubMed and drafted the manuscript.
