## In defense of hunting

With an arsenal of rifles, shotguns, muzzleloaders, handguns, bows and arrows, hunters kill more than 200 million animals yearly — and likely crippling, orphaning, and harassing millions more. Hunting can be necessary for controlling an animal population. It is unlawful to hunt any bear less than two years old or any bear in its company.

## In Defense of Hunting, Fishing, and Foraging

Private conservation efforts, led through hunting programs, are responsible for the resurgence of a variety of species on the continent. These anti-trophy hunting campaigns are very serious as many countries are joining the chorus now. Furthermore, unlike the cow or the chicken, the deer lived a free and wild life before being killed and had a chance to escape.

### Hunting

IN DEFENSE OF HUNTING is an easy-to-read instant education of why we carry on this rich, important heritage called hunting.

### In Defense of Hunting

At the heart of the non-trophy hunting debate in the United States is one species: white-tailed deer.
