### Foundations of Psychology Paper Free Essay Example

He organized these personality traits into three categories: cardinal traits, central traits, and secondary traits. Galen believed that the heart was the crucial organ of the body, because it contained the vital spirit that gave the spark of life to the person Wickens, 2005. The analogy of the mind as a central computer is the simplest way to describe the theory and the assumption is that the brain is in control of all.

### Explaining Personality: Biological Approaches and Trait Theories

Words: 983 - Pages: 4 ..

### Foundations of biopsychology by Wickens, Andrew P

These include discussions on how Einstein's brain was different; the effects of navigational experience on the shape of the brain; and how laughter affects the same areas of the brain as cocaine.

### Foundations of Biopsychology

Communication System - Endocrine and Nervous System A neuron is a nerve cell.

### Foundations of Psychology

Acquired traits, ideas, and feelings are, exactly that, acquired through our leanings we have generated through individual past experiences. People tend to be friendly and conventional in the Upper Midwest and Deep South; relaxed, emotionally stable, and creative in the West; and stressed, irritable, and depressed in the Northeast Rentfrow et al.

### Biopsychology

Although academically rigorous, the text adopts an accessible, modular format and is supported throughout by diagrams and images. They enjoy intellectual stimulation and feel uncomfortable in social situations.
