## Why We Search

Former library book; Readable copy. And truly knowing distant exoplanets requires ; greater understanding of our Sun will help us to know other stars.

## Majority of Humanity Say We Are Not Alone in the Universe

The same way we blink our high beams to send a signal to other drivers, we could use the shadow that Earth creates when it passes in front of the Sun to send a message to our fellow inhabitants of the universe. Some of the most well known projects are run by Harvard University, the University of California, Berkeley and the SETI Institute.

## E.T. Talk

Matthews, 4 May 2020, The Astronomical Journal.

## Are We Alone? Discovery of Billions of Earth

Both Shostak and Werthimer expressed their optimism that , and that it should be detectable in the near future, as long as SETI continues to receive the support it needs. Assuming that beings who can create spacecraft are smarter than me, they probably mastered that same tendency long ago. Its a bit like the early exploration of planet earth.

## The Odds of Intelligent Life in the Universe

Your tech has probably become very efficient so has your food and energy use, can you bottle up such vast quantities of energy for the trip, food etc. Seager, 47, is an astrophysicist. Princeton University astrophysicists Dr Timothy Brandt and Dr David Spiegel made the suggestions in a paper called 'Prospects for detecting oxygen, water and chlorophyll on an exo-Earth.'
