**[PDF] Matakawau Stingray Point Pa excavation, Ahuahu Great Mercury Island 1955**

The Bulletin of the American Schools of Oriental Research BASOR is a leader among peer-reviewed academic journals of the ancient Near East. Beckwith traces how the recursive argument method was first developed by Buddhist scholars and was spread by them throughout ancient Central Asia. The spatial, temporal, and cultural boundaries of the volume take in the Near East as well as Greece and Rome, and cover a period of some 2,000 years beginning in the second millennium BCE and ending with the spread of Christianity during the last centuries of the Roman Empire in the West.

Although written primarily for mathematics educators, this handbook will also be of interest to researchers of the history of education in general, as well as specialists in cultural and even social history. The terrace seems to have been used exclusively for storage, with unusual drainage features not reported elsewhere. BOOK SYNOPSIS Based on extensive research in Sanskrit sources, Mathematics in India chronicles the development of mathematical techniques and texts in South Asia from antiquity to the early modern period.

#### **April Meeting of the Board of Trustees on JSTOR**

In the context of this setting the following research questions were formulated: what circumstances fostered the rise and development of Śaivism in this area, and did the Skandapurāṇa, an important and contemporaneous religious scripture, play any role in that development? The majority are molluscan and this second part of a catalogue of these collections reviews the types for 14 chiton and two scaphopod species. Comparable previous work has been mainly confined to articles on aspects of communication in the Roman empire.

#### **Pataliputra excavation, 1955**

The studies focus on the Skandapurāṇa, Vakataka--Gupta history, Ramtek Ramagiri , Mansar, Ayodhya, Benares, pilgrimage and holy places tirtha. Epigraphical evidence, supported by archaeological remains, has shown that by the time of Śivagupta's reign, which lasted for at least fifty-seven years, Dakṣiṇā Kosala was already a rich centre of early Śaivism
