**Coal power in Canada must disappear by the end of 2029, new regulations say**

Driving the haul truck was included as part of his job duties. Under these circumstances, it is of the utmost importance that the Government of Canada—working closely with provinces, communities, employers, unions, and workers—put in place measures that will help both workers and their communities successfully navigate through the challenges imposed by the coal phase-out. This said, all of these provinces have, to varying degrees, reduced the amounts of coal mined and used in their generating stations over the past decade.

**Globe editorial: A climate success story: How Alberta got off coal power**

It is important to appreciate what has been accomplished: a lot, in a short time.

**Coal power in Canada must disappear by the end of 2029, new regulations say**

The western and maritime coal provinces have distinct economic circumstances and demographics. If you are a person mentioned in the story or you are a copyright holder and believe that any content should be removed, revised or taken down, please.

**Task Force: Just Transition for Canadian Coal Power Workers and Communities**

Polley and Munford then started hauling refuse material from the plant to the refuse pit with 50-ton end-dump Euclid Model 302LD haul trucks. Canadian utilities are actively exploring ways to deploy more renewables and recent infrastructure investments in hydroelectric prove that they are dedicated to following through. However, the Federal Environment officials don't swallow the projected 8% shortfall for 2025 to 2030 period; but have agreed to talk about and address that some more.
