## Mauritius Wildlife

Given that they were free from natural predators, they rapidly grew to large numbers and were soon preying on and competing with the local fauna. This migration is often done against fast moving currents, and crayfish have been observed to climb waterfalls by clinging on rocks. Flying fox Mauritius Crab eating macaque Birds Over 100 species of bird have been recorded in Mauritius.

## Major environmental review critical of 'tokenism' when consulting with Indigenous communities

A wide variety of birds have been introduced into Mauritius.

## List of birds of Mauritius

There is a small percentage of British descents with Mauritius nationality living in the country.

## UN's bleak biodiversity report highlights Canada's Indigenous protected areas

The wildlife of Mauritius is composed of its flora and fauna. In Mauritius it is found growing in full light on the plateau. The DODO bird Mauritius The native mammalian fauna of Mauritius is limited to bats and marine mammals.

## Africa: Illegal Giant Palm Oil Plantation Flattening Indigenous People's Rainforest and Threatening Endangered Wildlife in Cameroon

Yet countries still are slow to recognise this, she adds.
