ENERGY STAR®

Department of Energy DOE Office of Codes and Standards, conducted five two-day Regional Building Energy Codes and Standards workshops across the United States. Through advancing building codes, we aim to improve building energy efficiency, and to help states achieve maximum savings. Agency training needs fall into three categories: 1 specific improvements in the documentation, 2 materials and courses to educate users, and 3 mechanisms for providing information to users.

Energy Efficiency Training Courses, Training & Certification

Many said use of the standards would decrease the time and effort they now spend to establish energy-efficiency requirements and to confirm that proposed designs comply. Designers will need additional help, particularly in understanding how to design housing with improved energy-efficiency.

Missouri Home Energy Certification Program

Minimum energy efficient performance is also being considered to reduce CO₂ emission to the atmosphere with the reduction of energy consumption in industrial buildings. To ensure each of the 118 solar systems is operating at optimal potential, the Office of Energy is inspecting each system.

2019 Building Energy Efficiency Standards

Energy Assurance Grant Program Using American Recovery and Reinvestment Act funding, the FDACS Office of Energy worked with several state agencies to review and strengthen Florida's Energy Assurance Plan by incorporating recent and planned smart grid improvements and renewable energy facilities. State, local and tribal governments can use their allocation for low-interest federal bonds for qualified energy projects.
