Characteristica universalis

Throughout his years in Hanover, Leibniz maintained a stunning number of epistolary correspondents. Early in life, he documented the 2 , then revisited that system throughout his career.

Leibnizâ€™s Philosophy of Mind (Stanford Encyclopedia of Philosophy)

There is a similar irony in the fact that he was one of the last great polymaths - not in the frivolous sense of having a wide general knowledge, but in the deeper sense of one who is a citizen of the whole world of intellectual inquiry.

Biography of Gottfried Wilhelm Leibniz, Philosopher and Mathematician

It would seem, then, that Leibniz has something like the following in mind: experience informs us of a certain consistent set of sensible properties in, for example, gold; that is, a certain set of properties is compossible.

Biography of Gottfried Wilhelm Leibniz, Philosopher and Mathematician

Others consider the present to be perfect, ignoring the dark realities of nature and human experience. At the same time, Leibniz is quick to add that the mental activity of the dog is the same as the mental activity of human beings in three fourths of their actions, for most of us most of the time are not actually reasoning from causes to effects.
