**Vol. 56, No. 4, Nov., 1997 of The Journal of Asian Studies on JSTOR**

Cities offer the possibility of greater opportunities for economic integration and self-reliance for migrants and refugees and potentially offer a local integration alternative to return. Thanks to our on-site partners involved in the region, we are provided with a steady stream of data,

Filesize: 47.510 MB

which we attempt to process and elaborate on, in order to inform readers about relief efforts, damages to the communities, city and districts, along with the rehabilitation and rebuilding assessments and current progress.

## Village family planning volunteers in Indonesia: their role in the family planning programme.

In each province, two districts were purposively selected with the criterion that the family planning volunteers in that district can mostly work independently, two sub-districts from each district were then randomly chosen and in each sub-district, nine villages were selected randomly. They should be motivated to reveal their real potential. WWM cluster's most recent research is funded by Kurita Award Japan on studies related to water supply, flood and drought in Bandung.
