### What Can You Do With a Major in Biomedical Sciences? // Undergraduate Admissions // Marquette University

Both an urban planning career and a regional planning career involve reviewing site plans submitted by developers. This major offers a general introduction to the discipline before delving into more specialised areas including molecular genetics, human genetics, plant and microbial molecular biology and conservation biology.

### Top 10 Highest Paying Social Science Careers

Geological technicians, geology technicians, and petroleum technicians don't need specific certifications or licenses. Survey researchers don't need certification, however certification is highly recommended for people interested in a survey researcher career. Zoologists and wildlife biologists commonly work together and with other professionals, such as environmental scientists and hydrologists, in a research team.

### Life Sciences Admission Category

An economist may gain work experience through an internship or in working in fields such as business or finance.

### Life Sciences Admission Category

This scheme rewards students who perform well in Year 12 subjects that are relevant to their preferred UNSW degree. Environmental science tech careers involve placing the results of their field tests into presentations, charts, and reports in order to explain their findings to clients.

### Top 10 Highest Paying Social Science Careers

Historians provide advice on historical accounts and issues as well as preservation topics.

### Welcome to the School of Life Sciences

Those who choose to study the biological sciences can expect to expand their knowledge of cell theory, evolution, genetics, energy and homeostasis. We also have a substantial research portfolio and strive to achieve research excellence across this range.

## **Top 10 Highest Paying Social Science Careers**

Environmental scientist careers and environmental specialist careers include collecting environmental data through air, soil, water, food, and other material samples. Urban and regional planners must research and consider a lot before determining how best to use land.
