## Mysteries of the Hopewell on Apple Books

Close-up view of the northeast borrow pit at Mound City showing the distance to the river bank. This book attempts to answer the questions of why were they built, and who built them? One of the things the LiDAR image shows is that the large Hopeton circle is not a geometrically perfect circle.

## Mysteries Of The Hopewell: Astronomers, Geometers, and Magicians of the Eastern Woodlands

Among the most impressive of these earthworks were those created by people of the Adena and Hopewell cultures in south and central Ohio. Black Leaf is exquisite poetry of subtle and ironic commitment, steeped in a love and respect for language.

## of the Hopewell: Astronomers, Geometers, and Magicians of by William F. Romain

In this case, the LiDAR data reveal that the area where the longitudinal axis of the earthwork intersects the Large Circle is elevated, which may be the result of years of embankment erosion, or it could be evidence of a conscious choice in construction technique.

## William F Romain

An index fossil artifact type that characterizes Ohio Hopewell sites is the small delicate blades, called bladelets, produced from prepared cores of the highest quality cherts and flints, like those found on Flint Ridge in Licking County, or the Harrison County cherts of southern Indiana.

## Paleo Astronomy at Grave Creek Mound

It is important to note that the mound covers the remains of a large, multi-roomed, wooden structure, on the floor of which were buried the Hopewell dead.
