Madame de Lafayette: The Princesse

Madam de Cleves read this letter, and read it over again several times, without knowing at the same time what she had read; she saw only that the Duke de Nemours did not love her as she imagined and that he loved others who were no less deceived by him than she.

The Princesse de Clèves by Madame de La Fayette

The book uses an omniscient third person narrator, which is not shocking to today's reader, but was a startling innovation during Madame de LaFayette's time. What forces are acting on her? I am so entirely ignorant of them, that I thought a few days ago, the Constable was very well with the Queen.

employment under the reign of Charles the Ninth. It was universally believed that strong emotions could lead directly to a life-threatening fever; and indeed, modern research has done much to link emotional disturbances to organic disease.

What role does love play in his life? It doesn't seem to me that the narrator presents Mme.

In this novel, sentences tend to be dryer, and just give the information; this person was ambitious, this one is the most handsome and charming at court, and other tags like that. The next day he leaves without seeing his wife, but still sends her a letter, full of sorrow, tenderness and generosity.
