### Sefer Shiv' im panim la

Articles may be reprinted without permission. This inquisitive nature can either be suppressed, or hopefully, encouraged. How can 4 be the same as 5? Moreover, in the Jewish tradition each of the levels has their own reasoning procedures specific to that level.

### Sefer 'Ayin panim la

If they aren't given the courtesy as equal human beings to receive dignified attention to their questions? How can non-kosher be the same as kosher? It seems that, even though they were still enslaved, our ancestors had figured out a way to cope and survive their slavery without feeling oppressed. According to this approach, sometimes all we need to do is adjust our outlook on life. Did Hillel really think that Shammai was right on the very same point upon which Hillel was arguing? The halacha is that if one has learned through an area in gemora, searched clearly through the rishonim, and sees the law different than how he was taught, he has the right to follow his own mind.

### Shivim Panim LaTorah

Our teens are geirim because we have turned them into self-conscious beings — self conscious about their sexual orientation, or their material wealth, or their skin color, or body image, or all of the above, or none of the above. This is the starting point of all our textual exegesis.

### Sefer 'Ayin panim la

It is worth pointing out that Rabbeinu Bachya, in 11th century Spain, made the following remarkable observation about the Exodus from Egypt.

### Kol ha'Seridim: Parashas Naso: The True Meaning of Shivim Panim la'Torah

Teaching students and children that we can't question a Rashi or a Tosfos is basically telling them that the Torah just has to be followed without understanding. Young people have natural inquisitiveness. Our ancient Israelite ancestors endure the home stretch of enslavement under the gaze of the ruthless and unforgiving Pharaoh.

### Shivim Panim L'Torah

The study reminds us, yet again, about the tremendous pressures that are weighing down on our teens during this time in their lives in which they are particularly vulnerable.
