### Imagery: Definition and Examples

Examples of Imagery Example 1 Imagery using visuals: The night was black as ever, but bright stars lit up the sky in beautiful and varied constellations which were sprinkled across the astronomical landscape.

### Latest Satellite Imagery

Various items are described in-depth, so much so that the reader can easily visualize them.

### Imagery

It allows readers to directly sympathize with and as they imagine having the same sense experiences.

### Imagery

In this example, the experience of the night sky is described in depth with color black as ever, bright , shape varied constellations , and pattern sprinkled. In just a few lines, Bishop mentions many colors including brown, rose, white, and green. USGS digital orthoimage resolution may vary from 6 inches to 1 meter.

### Imagery: Definition and Examples

Orthoimagery data typically are high resolution aerial images that combine the visual attributes of an aerial photograph with the spatial accuracy and reliability of a planimetric map. For instance, the colors are emphasized in the green trees, red blooming roses, blue skies, and white clouds from the bright day to the dark night. The scent of hibiscus helps describe a scene which is relaxing, warm, and welcoming.

### Latest Satellite Imagery

Example 2 Imagery using sounds: Silence was broken by the peal of piano keys as Shannon began practicing her concerto.

## **Imagery**

Personification provides animals and objects with human-like characteristics.
