## CAB Direct

The extract can be used immediately or transferred to vials in 1 ml aliquots for storage at — 20°C.

## CAB Direct

If the experiment requires a longer period of cultivation, the explants have to be moved to a fresh agar gel every 5-7 days. These cultures are called primary cultures.

## Animal Cell and Cell Culture Notes: Introduction, Substrates, Isolation, Types and Techniques

Recombinant vaccines also score on their fast pace of development. Pieces of tissues from the organ are removed however, continuous cell lines are not used in virus production for human vaccines as these are derived from Agar Substrate: The problems encountered using plasma clots could be eliminated by the use of agar gels.

## ANIMAL TISSUE CULTURE IAN FRESHNEY PDF

It is not necessary that the cells which are plated into cultured medium will start immediate growth.
