About a third of native freshwater plants and invertebrates are also at risk. The Tarndale Bully lives in only a handful of small subalpine tarns in the headwaters of the Clarence and Wairau Rivers in Marlborough. No fish lives in a more remote place than our rare Tarndale bully.

Marine fishes of New Zealand (Book, 1997) [satis.farmjournal.com]

One of our freshwater fish is already extinct — the grayling or upokororo *Prototroctes oxyrhynchus*. Threats to our natives One of the biggest issues for our freshwater fish has been loss of habitat such as the clearing of bush and forest that many species need for shelter and to support their food sources.
