A Brief History of Natural Gas

The US has long imported large quantities of gas from Canada, and exported smaller quantities to some parts of eastern Canada. If a restriction imposed by the commission on the production of oil from an oil well operates to increase the gas-oil ratio of the well so as to then classify it as a gas well under the provisions of this chapter, the well nevertheless shall be considered to be an oil well.

» The Market Under Regulation satis.farmjournal.com

Essentially, the NGA gave the Federal Power Commission the FPC, which had been created in 1920 with the passage of the Federal Water Power Act jurisdiction over regulation of interstate natural gas sales.

» The Market Under Regulation satis.farmjournal.com

In 1976, the federal government established the Eastern Gas Shales Project, a large research effort to find ways to produce gas from shale. Essentially, FERC allowed pipelines, on a voluntary basis, to offer transportation services to customers who requested them on a first come, first served basis. The New England States are connected by pipeline to the rest of the US and to Canada, but the existing pipelines are insufficient to supply the winter demand.

Division of Natural Gas Regulation

However, this has not always been the case. And it will get worse every day until we act. Today, competitive forces are being relied upon more heavily to determine market structure and operation.

Division of Natural Gas Regulation

The commission shall adopt and enforce rules and orders to: 1 conserve and prevent the waste of gas; 2 prevent the waste of gas in drilling and

producing operations and in the piping and distribution of gas; 3 require dry or abandoned wells to be plugged in a way that confines gas and water in the strata in which they are found and prevents them from escaping into other strata; 4 provide for drilling wells and preserving a record of them; 5 require wells to be drilled and operated in a manner that prevents injury to adjoining property; 6 prevent gas and water from escaping from the strata in which they are found into other strata; 7 require records to be kept and reports made; 8 provide for the issuance of permits and other evidences of permission when the issuance of the permit or permission is necessary or incident to the enforcement of its blanket grant of authority to make any rules necessary to effectuate the law; and 9 otherwise accomplish the purposes of this chapter.

METER AND PRESSURE TESTS

Sec. The daily market demand for gas and the daily allowable shall be determined by dividing the monthly demand and the monthly allowable by the number of days in the month.

NATURAL RESOURCES CODE CHAPTER 86. REGULATION OF NATURAL GAS

All final natural gas customers are entitled to select their supplier in the market, while only households and small customers are entitled to public supply households and small customers can both exercise that right and select an electricity supplier in the market.

The field regulation of natural gas (Book, 1969) [satis.farmjournal.com]

Drilling a natural gas well on land may require clearing and leveling an area around the well site. Electricity from oil-powered generators in the US declined 81 percent from 2005 to 2014.
