## CHAPTER 9. CHEMICAL KINETICS

These ions, in which the central carbon atom lacks a complete octet, are highly reactive, and in step the carbocation is attacked by the hydroxide ion which supplies the missing electron. For polychromatic radiation, as in the atmosphere, equation must be integrated over the wavelength spectrum: 9. If we wish to emphasize the reversible nature of a reaction then we need to write it as a two-way reaction, R10 Eventually, steady state is reached between the forward and reverse reactions: 9.
