Several factors contribute to the unsafe conditions on K2. Such storms have killed many climbers on K2 in the past.

## Storms chasers: One of the world's most dangerous jobs

You want to get close — but not too close.

## Chasing the world's most powerful thunderstorms

But at the time frame of roughly seven to 10 days in advance of the storm, meteorologists can identify a broad weather pattern more conducive to severe weather and tornadoes. The is, however, based on the number of deaths and not on the actual deaths per safe returns ratio.

## What it takes to chase the world's most violent storms

Avalanches are the most significant natural cause of death on this mountain. Wind dynamics are usually stronger and foster a greater tornado risk near the triple point, but storms sometimes congeal and become messy. Mount K2 As of 2012, 50 and 31 deaths occurred during ascent and descent on Mount K2, respectively.
