## Sex and the Origins of Death

These growth factors, security codes, telomeres or some other mechanism may finally be commandeered to salvage us from oblivion.

## Why We Say Death Do Us In Wedding Vows

But fierce competition gradually led to multicellular animals--size being an advantage against predators--and with this change came cell specialization and, most important, germ cells in which reproductive DNA was segregated. They and their progeny are granted another 200 generations. But when the environment becomes harsh, bacterial parents spontaneously engage in sex, swapping genes with others as a gamble on survival.
