## Système de référence géodésique

Unattached individuals refers to household members who are not members of an economic family. However, where statistics are not suppressed but are still based on relatively small totals, the readers are strongly advised to exercise caution in the use and interpretation of these statistics.

## Carte de référence

Un secteur de recensement provincial SRP est un concept géographique comparable au secteur de recensement qui englobe tous les territoires situés à l'extérieur des 37 centres divisés en secteurs de recensement. Ces ajustements aux chiffres de la langue parlée à la maison facilitent la mise en relation des données de 1986 avec celles de 1981 mais ne rendent pas parfaitement comparables les résultats des deux recensements.
