## Five Things About SAP's Strategy That You Need to Know

The benefit of using this methodology is that with the smaller packages of work allocated to a sprint, it becomes easier to manage, design, build and unit test the discrete work packages. Implementation is defined as a process started with decision to adopt ES systems and finished when organisation already used the systems as an integral part of the organisation.

## Model

Project sponsors and Management need to spend sufficient time preparing a budget and work out a sensible project plan together with the consulting firm chosen. It is an enterprise-wide information system designed to coordinate all the resources, information, and activities needed to complete business processes such as , , , and.
