Providing Care to Individuals With Special Healthcare Needs

Self-advocates and family members were invited to participate in focus groups to discuss their experiences of seeking and receiving dental treatment.

Communicating with the aphasic dental patient, Special Care in Dentistry

Recruitment strategies and organisational arrangements Seven trials reported inviting dentists to participate in research. Considerations While the ADA provides a number of regulations for accessibility, you can go the extra mile and make your dental office more functional.

ADA Compliant Front Desk Design

Other common causes include poor clinical management, overly aggressive behavior by doctor or personnel, a poor recall system, or severely adverse local economic conditions. The specified assistant alone should make and change all appointments according to the doctor's policies. The interview guide was reviewed and modified in an iterative fashion after each focus group.

CHAPTER 3: BASIC OFFICE POLICIES, PROCEDURES, AND SYSTEMS

Grounded Theory and Organizational Research. In some offices, the doctor may also desire to have an assistant take some of the basic case history. With some exceptions, you schedule appointments by day; but it is your scheduling assistant who must arrive at an agreeable time of day for the patient.

Clinical trials in dental primary care: what research methods have been used to produce reliable evidence?

Int J Paediatr Dent 1996; 6: 107—110. Racial disparities in the quality of care for enrollees in medicare managed care. Smith will be happy to

discuss fees with you.

CHAPTER 3: BASIC OFFICE POLICIES, PROCEDURES, AND SYSTEMS

This may require making modifications, including an operatory designed to allow for wheelchair transfer. On the surface, it may appear that anyone can look at the appointment book, see an opening, and fill in a name for the time reservation.

Resource Library

If you experience delamination while printing on the Pro2 printer, recalibrate the scanner, clean the glass slider and glass on the resin catch tray. Records are maintained to assure that the same patient will not receive the same letter twice. Adequately communicate to the parents and patient how such a program can be affected.
