## Rethinking Scientific Change and Theory Comparison:

Contribution to the above 'Some Reflections on Experimental Incommensurability: Comment on Lena Soler', in Rethinking Scientific Change and Theory Comparison: Stabilities, Ruptures, Incommensurabilities? This research is based on library research to reveal how modern science works and its relation to Islamic science.

## Indigo

Kulkarni ed , volume on experiment.

## Rethinking The Scientific Revolution

Boston Studies in the Philosophy of Science, vol. In the last two decades, objects of analysis such as 'the state' have increasingly been seen as uncertain and contested theoretical concepts.

## Indigo

New topics in this edition include science and the corporate world, the regulation of science and technology, and climate change.

## Paul Hoyningen

It explores the balance and tension that exists between commensurability and continuity on the one hand, and incommensurability and discontinuity on the other. The focus of this research is Thomas Kuhn's scientific revolution which then drew the common thread over the building of Islamic science.

Each paper is followed by a critical commentary. Contributions focus on key themes, such as Martin Luther or the Swiss reformations, offering an up-to-date perspective on current scholarly debates, but they also address many new themes at the cutting edge of scholarship, with particularly emphasis on the history of emotions, the history of knowledge, and global history.
