Such causes of poverty and inequality are no doubt real. From an ecological perspective, the sustainable development efforts have not been successful.

## In focus: Women and the Sustainable Development Goals (SDGs)

A number of direct and indirect subsidies Page 204 to energy suppliers and technologies have shaped and continue to shape the evolution of the current fossil energy system. However, recently some new and old NGOs alike, have started to become more participatory and grassroots-oriented to help empower the people they are trying to help, to help themselves.

## THE 17 GOALS

Production of the globally traded staples maize, wheat, rice, soybeans, poultry, and swine will be driven by new technologies already in or rapidly moving toward the private sector.

## Women in Development: A Critical Analysis on JSTOR

For a significant number, their remoteness affects their ability to be part of the global supply chain, increases import costs - especially for energy - and limits their competitiveness in the tourist industry.

## In focus: Women and the Sustainable Development Goals (SDGs)

**The role of women in rural development, food production and poverty eradication 2013**

Committee on Examination of Plant Science Research Programs in the United States. Land transformations and use in forestry, grazing, and agriculture have modified nearly 50 percent of the earth's land surface. Recent quantitative studies have revealed that nexus approaches can uncover synergies and detect trade-offs among sectors.
