**Nei Menggu zhi wu zhi (1990 edition)**

Zhong Yi Yao Xue Kan. Chinese with abstract in English.

**Fracture healing with osteopathy in traditional Mongolian medicine**

Among all intervention components, the top three frequently used components were distributing written materials, delivering lectures and providing gait, balance and functional training. Up to 6 intervention categories were delivered to older people based on the assessment of their fall-related risk factors, including history of disease, history of falls, balance, fear of falling, home environment, and activities of daily living.

**Wu Wei Zi**

The investigation on the role of safety education and home environment reform in preventing elderly people from falling. Exercise for preventing falls in older people living in the community. For instance, it is used with and in the formula Ling Gan Wu Wei Jiang Xin Tang from Jin Kui Yao Lue.

**Nei Menggu shi zhi / [Tian long Chang Cheng wen hua yi shu gong si]**

Intervention strategies and risk-factor modification for falls prevention: a review of recent intervention studies.
