

Airborne magnetic and electromagnetic surveys : residual magnetic field and electromagnetic anomalies : Temagami area.

Ministry of Northern Development and Mines - Magnetic anomaly maps and data for North America

Description: -

- Geology - Ontario - Temagami Airborne magnetic and electromagnetic surveys : residual magnetic field and electromagnetic anomalies : Temagami area.

- Ontario. Geological Survey. Map 82 070 Airborne magnetic and electromagnetic surveys : residual magnetic field and electromagnetic anomalies : Temagami area.

Notes: 11

Airborne magnetic and electromagnetic surveys : apparent conductance and electromagnetic anomalies : Temagami area. (edition)

Aeromagnetic surveys of Wyoming merged to form seamless grids across the state. Resulting resistivity models confirm geologic framework, constrain hydrostratigraphy and depth to basement, and reveal fault and fold distribution. Original Release Date: Aug 2011. Notification Date of Data Errata: Septem A problem has been.

Airborne magnetic and electromagnetic surveys : residual magnetic field and electromagnetic anomalies : Cochrane area. (edition)

Gravity anomaly data are provided as well. Eastern Time, or 9:00 a.

GPR 2011

~8ting of,electromagnetic and magnetic, were carried out over a previously cut grid of lines in the Kesagami Lake Area of Ontario. The aerial survey included measurements of the earth's magnetic field and of the radioactivity of the surface rocks and soils. Gravity anomaly data are provided as well.

(PDF) Airborne magneticand electromagnetic surveys : Kesagami Lake area. Download Ebook

Flight-line and gridded data, with description of methodology and interpretation Survey to map concealed faults that may be related to geothermal resources, such as hot springs; data given are surface locations of faults interpreted from the survey. Airborne magneticand electromagnetic surveys : Kesagami Lake area.

GPR 2011

Maps A and B red outline in above map image are gravity and aeromagnetic maps, re Grids, images, and flight-line paths for magnetic and resistivity surveys Grids, line data, and imagery derived from them covering the small study area. Flight line data, grids, and inversions for these surveys are intended to help understand shallow groundwater and develop groundwater resource plans for the aquifer. Aeromagnetic surveys of Nevada, merged to form seamless grids across the state.
