

# Nonwandering sets of Lorenz maps

**typescript - Monotonicity and non**

Description: -

-Nonwandering sets of Lorenz maps

-Nonwandering sets of Lorenz maps

Notes: Thesis (Ph.D.) - University of Warwick, 1990.

This edition was published in 1990

**ds.dynamical systems**

It never settles into a fixed point or a limit cycle.

**The Lorenz Map: Short**

Since the eigenvectors have components both the eigenspaces cover the torus.

**dynamical systems**

When  $N$  is set to an integer value, the position and momentum variables can be restricted to integers and the mapping becomes a mapping of a toroidal square grid of points onto itself. Unless otherwise noted, we will always assume all maps to be nontrivial.

**dynamical systems**

Other systems often suffer from ground effects which reduce the depth range in the ground.

**dynamical systems**

Just after growth rate 3. For these maps the topological entropy coincides with that of the Bernoulli shift on two symbols, i.

**Continuous maps of trees and nonwandering sets**

Fourier Grenoble , 55 2005 , 2375.

**Continuous maps of trees and nonwandering sets**

Acheron: If you think you're up to the task, then by all means. The number of iterations needed to restore the image can be shown never to exceed  $3N$ .
