White spotting patterns can be divided into distributed white or patch white patterning.

Horse Genetics

The T-variant is common in Arabian lines that produce successful endurance horses. Ruvinsky has been working in several fields of genetics for more than 40 years. There are also assumed to be fewer recombinant chromosome types to show how this can affect ratios: Genetic contribution from mare: Genetic contribution from stallion: 2% To T E Parental type 2% To + e Parental type 48% To T e Recombinant type 48% To + E Recombinant type 2% To T E Parental type 0.
