In January 2021, Roberts presented a ten-part narrative history series about the human body entitled Bodies on. In August 2016, she presented the BBC Four documentary, Britain's Pompeii: A Village Lost in Time, which explored the in. Positional behavior in The International Encyclopedia of Biological Anthropology, Wenda Trevathan ed.

## Professor Alice Roberts

Initially of interest to physicians from the time of the Enlightenment onwards, the history of medicine has gradually gained the attention of historians, sociologists, philosophers, anthropologists, and other social science students. In 1998 she left clinical medicine and worked as an anatomy demonstrator at the , becoming a lecturer there in 1999.

In December 2018, she presented a series of three , titled Who am I? Jobs in Europe include field and osteological work for Siena University, Italy, particularly at Poggio Bonizio and Santa Maria della Scala. Roberts studied at the now part of and graduated in 1997 with a MB BCh degree, having gained an degree in. The discussions aim to place the three populations within the wider context of 19th-century London and Britain, with the findings well illustrated and fully tabulated throughout.

Dr Sonia Zakrzewski

Full text not available from this repository. These excavations have contributed to a re-consideration of the settlement and occupation of this landscape in the early and late Mesolithic and have led to a fundamental change in our understanding of early prehistoric societies. Journal of Archaeological Science: Reports 17, 650-656.

### **Don Walker**

Her research interests also include burial ritual, particularly multi-period cemeteries, which often span millennia. Abstract Teeth have long been used to assess diet or disease status in populations but have also more recently been employed to assess population history and patterns of migration and movement. Giorgia Baldacci is pictured here reading a message on behalf of the volume editors Posted 24.
