## PROJECT 1947

Harbinson has probably presented the best case for man-made UFOs in this volume. No, I wouldn't guess at speed or size. There are numerous examples of products or technology being introduced as new, or cutting-edge, whereas they had already been secretly used — for years in many cases — by the military or by certain government agencies, or both.

This then creates a vacuum around the craft, allowing it to propel itself at high speeds. It is further recommended that pertinent collection directives be revised to reflect the contemplated change in policy.

### Inception: Projekt Saucer, Book 1

They are enlarged to enhance the visual clarity of the chart. He also said that the objects flew in tight formation, but not in the formation used by military planes in the United States. Its like a car, which will not move even when completed - it needs fuel, a road and someone to ignite it with a

key.
