### What are the demographic factors that effects social changes ?

The reasons for their higher mortality rates are not well understood. Details of the 2011 census were revealed by the government on August 25.

### Religion, Population Growth, Fertility and Family Planning Practice in India on JSTOR

Bongaarts J, Potter RG: Fertility, biology, and behavior: An analysis of the proximate determinants. This was done out of the government's belief that for the nation to best develop and avoid hardship, the educated classes should be encouraged to contribute to the nation's breeding pool, while the uneducated should not, sparking the Great Marriage Debate. The study found that on average married Nepali women of reproductive age woman give birth three times and women aged 40-49 five times.

### Religious Census 2011 sucks: Hindu population may even now be overstated

The Total Fertility Rate of women is also coming down. The rate of domestic migration is also low among Hindus. In 1901, the total population of Singapore was 228,555, with 15.

### Religious Census 2011 sucks: Hindu population may even now be overstated

Karki YB: Estimates of total fertility rates for Nepal and its geographical sub-divisions and administrative zones 1971 and 1981. Programs that focus on reduction of infant and child mortality could also be considered, which would also help to reduce fertility. The children ever born to all women irrespective of the age group lifetime fertility and women aged 40-49 completed fertility were analyzed separately as a measure of fertility.
