Several types of research were undertaken for first time lithology and geochemistry of sea ice and snow, marine aerosols, sea snow, hydrooptics combined with satellite studies, matter and energy fluxes etc. Осадки и испарение оказывали максимальное влияние более 2,4% на интенсивность внешнего водообмена в августе, минимальное 0,06% — в апреле.

STUDY OF WATER CONTENT EFFECTS ON THE INTENSITY OF THE EXTERNAL WATER EXCHANGE IN THE Dnieper Reservoirs

Extended information on concentrations of chemical substances in bottom deposits solid phase and pore solutions liquid phase is presented and analyzed.

Gidrologicheskie i ekologicheskie protsessy v vodoemakh i ikh vodosbornykh basseinakh (1995 edition)

Водные ресурсы и водный баланс крупных водохранилищ СССР. Shipping and handling charges are based on the actual weight.

УДК 556.552 Е.В.Обухов1, Е.П. Корецкий2 ИССЛЕДОВАНИЕ ВЛИЯНИЯ ВОДНОСТИ ГОДА НА ИНТЕНСИВНОСТЬ ВНЕШНЕГО ВОДООБМЕНА ДНЕПРОВСКИХ ВОДОХРАНИЛИЩ

Lake Ecosystems: Biological Processes, Anthropogenic Transformation, and Water Quality.

Например, расход реки в районе г.

Gidrologicheskie i ekologicheskie protsessy v vodoemakh i ikh vodosbornykh basseinakh (1995 edition)

It is shown that hydrodynamic processes and different types of water flow like laminar and turbulent lead to differences in chemical substances distribution and water masses mixing in rivers, reservoirs and regulated water objects. Nauchnye i prakticheskie aspekty intensifikacii proizv. K Index no index present LC call number GT4856.
