July 1, 2002 Mental health professionals may predict, warn or take precautions if and only if an actual threat of bodily harm against a clearly identified victim is communicated and the professional, using the reasonable skill, knowledge, and care ordinarily possessed and exercised by the professional's specialty under similar circumstances, has determined or reasonably should have determined that the service recipient has the apparent ability to commit such an act and is likely to carry out the threat unless prevented from doing so. After Tarasoff returned from a summer in Brazil, Poddar murdered Tatiana with a knife. Finally, patients may obtain an accounting as to who has accessed the PHI and the details about each disclosure.
