## An 11

By under headings, rather than the usual clinical disease BARBARA BARTLETT STIMSON, A. Treatment should aim for continued normal jaw growth to maintain symmetry and a balanced occlusion.

## Oral & Maxillofacial Pathology

Pathologic considerations in maxillofacial injuries receive adequate attention, and complications such as infection, shock, hemorrhage and associated head lesions are given due consideration. Advanced Trauma Life Support ATLS and facial trauma: can one size fit all? Additionally, even with the advances in body armor and helmet design, Cranio- and Oral-maxillofacial CMF, OMF injuries continue to occur in hostile environments. He then describes the anatomical variations from the normal pattern of arteries and veins, before reviewing the pathological conditions affecting the vascular system in childhood, seeking for the similarities and differences between these and the vascular diseases of adult life.

## Treatment of Facial Injury

All patients require an initial consultation and X-rays if needed.

This Clinical Professor of Medicine Dermatology , Stan- excellent section is the outcome of a careful study of some ford University Medical School; etc.

## Welcome

If the victim is unconscious but breathing well and shows no sign of hemorrhaging into the airway, you can use an oropharyngeal or nasopharyngeal airway to ensure airway patency. When can I get the results? Advances in technology should be leveraged to perform research that will develop more sensitive methods to predict DE.
