The Third World Security Predicament: State Making, Regional Conflict, and ...

The emergence of a new generation of weaponizable technologies — including cyberweapons, drones, robotic weapons systems and Artificial Intelligence AI — has created incentives for states to be secretive about their capabilities and intentions.

The Third World security predicament : state making, regional conflict, and the international system..

Subsequent chapters analyze the dynamics of interstate conflict in the Third World, the role of Third World countries in the international system, and, especially, the critical impact of the end of the Cold War on the Third World security problematic. The other part is zones of turmoil, war, and development.

The decline of cooperative interventions If there is less consensus over the need for transparency in security affairs, there has been a parallel diminution in support for cooperative interventionism.

Muddling Through to 2030: The Long Decline of International Security Cooperation

Post-positivism In the philosophy of science, the term post-positivist has been used in two ways: 1 To refer to scientific philosophies that arose after, and in reaction to, positivism

The Third World security predicament : state making, regional conflict, and the international system..

Reflectionism attempts to take this tradition one step further, not only by appropriating the tools of the oppressor, but by turning those same tools against the oppressor.

The Third World Security Predicament: State Making, Regional Conflict, and the International System by Mohammed Ayoob

Even without a deep shock to the global system like a major power war or atomic explosion, there will be less international security cooperation in 2030 than today. This paper draws heavily upon the analysis in my book *The Third World Security Predicament: State-Making, Regional Conflict and the International System* Boulder, CO: Lynne Rienner, 1994. Yet given the mistrust between the major powers, and the possibility that new technologies could decisively alter the balance of military power, it is hard to see states opening up to mutual intrusion over their programs or placing strong legal limits on their use.
