## Construction is third most stressful industry

Check Out The Video Version! However, the Office of National Statistics ONS recently published data showing the construction industry has the highest incidence of suicide by occupation. Bending stress is a more specific type of normal stress. All stress related figures refer to the yield strength.

## Stress

Winning regular work at the right margins can be very difficult.

## Occupational Stress in the Construction Sector

Employers should be willing to make accommodations where possible.

## Stress

The current incidence rate of mental ill-health in the construction sector is 0. There are also companies that offer mental health support—something worth asking about in your own firm.

## Stress Management and Work

A case-crossover study of heat exposure and injury risk among outdoor construction workers in Washington State.

## Workplace Stress within the Construction Industry

And when projects fall behind, construction workers bear the brunt of that stress. The health and wellbeing side of the picture has sometimes been ignored in comparison, and changing this requires major, ongoing change.
